PUBLIC SALE**
Stage 1
Token Allocation: 15,828,755 tokens SOLD OUT
Token Price: \$0.001 per token

*The **snapshot holders** presale is a special early access token sale event for dedicated members of our community. A snapshot was taken of wallet addresses holding our [EverETH Reflect](#) token. Wallet addresses on this snapshot have been whitelisted and given priority access to purchase EETH tokens at a discounted presale price before the main public presale opened.

The **public sale is the main token sale event open to the general public. Anyone can participate by purchasing EETH tokens during the public presale, while supplies last. There will be a limited number of tokens available at the public presale price, with every stage passed the price to be increased.

Note: Contributors purchase tokens by sending ETH to the sale contract, with the number of tokens received determined by the ETH/token rate at the time of transaction. Before participating in the EETH presale, please conduct your own research, review the [Terms Of Use](#) , [Risk Disclaimer](#) , the [Docs Website](#) and make an informed decision.
